

IAPD & THE SUSTAINABILITY OF PLASTICS

Since 1988, an increased use in plastic parts has lowered the average weight of a vehicle by 145 pounds, saving the equivalent of 21 million barrels of oil over the life of these vehicles.

IAPD RECYCLED MATERIALS ANNUALLY (IN POUNDS)

IAPD RECYCLED MATERIALS ANNUALLY (IN POUNDS)

In just one year, an IAPD member company's environmental savings were the equivalent of the annual greenhouse emissions of nearly 500 passenger cars.

More than 50 percent of a typical car is composed of plastics and polymer composites, but those materials account for only approximately 10 percent of vehicle weight.
